

## Rapid Coagulation Test for Pets

### Microfluidic Coagulation Analyzer (Electrochemistry)

**Fast:**

Available with report within 7 minutes using only one drop of whole blood

**Simple:**

Addable with whole blood sample, easy to operate

**Accurate:**

Comparable to international first-tier brands

Test  
Items

✓ PT/INR ✓ APTT

✓ FIB ✓ TT

✓ ACT

### Screening for coagulation disorders

- 1 Skin petechiae, purpura, or ecchymosis
- 2 Gum bleeding
- 3 Small wounds bleeding continuously
- 4 Hematuria and hematochezia
- 5 Gastrointestinal bleeding
- 6 Mucosal bleeding
- 7 Anemia

### Preoperative examination

- 1 Pets with underlying internal diseases
- 2 Uterine pus accumulation
- 3 Tumors
- 4 Surgery
- 5 Biopsy

### Diagnosis and prognosis of internal diseases

- 1 Poisoning by highly toxic, arsenic-containing pesticides, etc.
- 2 Multi-organ dysfunction and failure
- 3 Obstetric diseases and complications
- 4 Canine microcephaly, leptospirosis, heartworm, feline infectious peritonitis
- 5 Blood diseases such as leukemia and sepsis
- 6 Immune system diseases
- 7 Canine acute hepatitis, pancreatitis

### Operating Procedures

- 1 Click to test
- 2 Scan the QR code
- 3 Insert reagent kit
- 4 Add sample
- 5 Start test
